

Currently we are searching for several german companies specialised in civil engineering

Several road construction Specialist / Workers for civil engineering / Workers for concrete constructions

Your tasks:

- You will be involved in setting up construction sites and traffic safety measures
- This also includes loading, transporting, removing, installing and compacting floor dimensions as well as breaking open and re-sealing surfaces of all kinds
- You lay cables and empty conduit systems for the infrastructure of the low-voltage, medium-voltage, street lighting and broadband network
- You operate various construction machines including mini excavators, wheel loaders, trucks etc.

Workers Tasks for concrete constructions:

- Placing, processing and compacting of concrete in precast elements
- understanding and implementing industry standard precast plans
- Operation of various production machines in the precast plant

Your profile

- Completed training as a civil engineer or comparable training, e.g. road builder
- Knowledge in the field of network construction as well as in underground line construction (DIN 4124, DIN 4123, DGUV38; VOB-A and VOB-B) is an advantage, but not a prerequisite
- Independent and goal-oriented working method
- Working in the open air is fun for you
- You are in possession of a valid driving licence of class BE / C1E / CE (old class 3 or class 2)
- Proof of operation of construction machinery; construction machinery driving licence desired, but not required
- Training for working on underground gas, water, electricity lines (GWS 129)
- Further training is a matter of course for you, because you live the motto "Standstill is regression!"

Company`s offer:

- Diverse, interesting fields of activity
- Regulated working hours (8 h/day)
- Permanent position for an indefinite period (30 vacation days)
- Attractive, performance-related income 2500 – 3500 €
- Extensive social benefits (company pension scheme, Christmas and holiday bonus)
- Professional development opportunities
